

Initial inspection of fire detection systems

Thanks to the extensive experience Vinçotte has when it comes to fire detection installations, we are the expert when it comes to control and inspection of fire detection systems.

Your tailor-made solution

We understand that the safety of your building and your staff is of paramount importance to you. That is why it is important to have your fire detection and fire alarm system thoroughly inspected upon commissioning. During the initial inspection, we ensure that the entire fire detection system meets all applicable requirements.
